An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Allowable Subject Matter

Claims 1-7, 8, 10, and 12-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the partially automated transmission system as claimed, and particularly including an intent-to-maintain signal provided only if there is no signal from the second operator selector indicating an intent-to-shift, and including the remaining structure and controls of claim 8. The present invention also particularly includes sensing a requirement to move the positive clutch member, independent of a shift member and master friction clutch, wherein said intent-to-maintain signal is provided only if there is no such requirement to move sensed, and including the remaining structure and controls of claim 10. The present invention also particularly includes a third condition for applying a greater resistance to movement of the
